

FOR IMMEDIATE RELEASE:

Special Report: Green Building Automation
to be featured on the Special Edition TV series
Green Earth Report

Miami, FL (October 4 , 2011) --- Global News Group, Inc. announces that Tridium will be featured on a Special Report, "Green Building Automation Technology" as a part of the Special Edition TV series; *Green Earth Report*. The show will be airing in the fall on **the FOX Business Network** to over 92 million households in North America and Internationally. Watch for our upcoming announcement on airing dates and times.

About Tridium

Tridium, Inc., is the global leader in open platforms, software frameworks, automation infrastructure technology, energy management and device-to-enterprise integration solutions. The technology and applications from Tridium have fundamentally changed the way devices and systems connect, integrate and interoperate with each other and the enterprise. Tridium's configurable software frameworks extend connectivity, integration and interoperability to the millions of devices deployed in the market today and empowers manufacturers to develop intelligent equipment systems and smart devices that enable collaboration and communication between the enterprise and edge assets. The company's platforms allow for building and managing complex monitoring, control, and automation solutions, including applications for building control, facility management, industrial automation, medical equipment, physical security, energy management, telecommunications, M2M and smart services.

Jay Crosby, Executive Producer at Special Edition TV added, "As the demand for innovative environmental solutions grow, Tridium has positioned itself to meet this ever-increasing demand. Energy efficiency is a leading requirement as energy demands increase. As government mandates and corporate initiatives are pointing more to sustainability and environmental stewardship, the technology from Tridium represents a significant step in accomplishing those goals. We are excited to have them as a guest on our program."

Featured in the **Special Report**, Steve Fey, President of Tridium, speaks about the smart building technology from the company. This system, the Niagara Framework, is a software platform that integrates diverse systems and devices regardless of manufacturer, or communication protocol into a unified platform that can be easily managed and controlled in real time over the Internet using a standard web browser. Implementation of the Niagara system creates better buildings. Buildings that are smarter, use less energy, are more efficient, have lower operating costs, are safer and contribute to a sustainable environment. To date, the Tridium Niagara Framework technology can be found in use in over 50 countries.
