

Tridium Receives 2014 M2M Evolution IoT Excellence Award

Niagara Framework Honored for Excellence in Innovation

RICHMOND, Va., January 9, 2015 — Tridium, Inc., a commercial Internet of Things (IoT) software technology leader, announced today its Niagara Framework software has received a 2014 M2M Evolution IoT Excellence Award presented by [TMC](#) and [Crossfire Media](#). The 2014 M2M Evolution IoT Excellence Award honors innovative products that support the availability of information being deduced, inferred and directly gathered from sensors, systems and anything else that is supporting better business and personal decisions.

“We are honored to be among the winners of this award.” said Nino DiCosmo, president and general manager of Tridium. “Tridium has been leading the charge in the Internet of Things for 15 years and this award reflects that commitment to open innovation.”

With nearly a half-million installations worldwide, the open Niagara Framework is quickly becoming the operating system of the Internet of Things. Its open API, open distribution business model and open protocol support give businesses and developers the freedom to choose how they work, what they build and with whom they partner. It enables them to connect and control devices, while normalizing, visualizing and analyzing data in ways never before imagined.

Tridium recently announced the release of the beta version of Niagara 4, the next generation of the Niagara Framework. End-users will find the latest generation of Niagara faster and easier to use — making it possible to directly access, analyze and act on a wide range of operational data. A truly open framework, Niagara 4 delivers a variety of significant improvements to help businesses take full advantage of the Internet of Things, including advanced visualization and new search, security and navigation tools.

“It is my pleasure to recognize the Niagara Framework with an M2M Evolution IoT Excellence Award for its excellence in innovation,” said Carl Ford, CEO & Community Developer, [Crossfire Media](#). “As a leader in this rapidly evolving industry, I look forward to seeing Tridium’s future successes.

The winners of the 2014 M2M Evolution IoT Excellence Award will be highlighted in the first quarter edition of *M2M Evolution* Magazine and on www.m2mevolution.com.
